## *Thank you Dr. Castillo!*

On September 20, 2011 Dr. Diane Castillo gave a very informative presentation on the diagnostic criteria for Post-traumatic Stress Disorder (PTSD), followed by a review of the literature on Evidence-Based Psychotherapies (EBPs), including Prolonged Exposure (PE) and Cognitive Processing Therapy (CPT). The PE protocol will be covered in some depth followed by data supporting the use of EBPs in a group format. This presentation was the most well attended CE to date! Despite the technical difficulties, Dr. Castillo, left her audience well informed and wanting more information.
