

## Certified Clinical Research Associate (CCRA<sup>®</sup>) Examination Detailed Content Outline

(Effective October 2019)

This document contains the Detailed Content Outline (DCO) for the Clinical Research Associate Examination. Each question on the exam is based on this outline.

## Introduction

The CCRA program is accredited by the <u>National Commission for Certifying Agencies (NCCA®</u>). NCCA Accreditation is an impartial, third-party validation that the CCRA program has met recognized national and international credentialing industry standards for development, implementation, and maintenance of certification programs. The Academy of Clinical Research Professionals (the Academy) develops the CCRA exam using certification industry best practices, as aligned with the NCCA Standards for Accreditation of Certification Programs.

In following these best practices, the Academy conducts a Job Analysis Study every five (5) years to ensure content validity of the CCRA Examination. Program content validity is demonstrated with a comprehensive job analysis conducted and analyzed by experts, with data gathered from practitioners within the profession. The process utilizes knowledge and task focused guidelines to assess clinical research professionals' competence, and determine the level of importance and frequency of specific knowledge and tasks required to perform in the role of a clinical research associate.

## Using the CCRA Detailed Content Outline (DCO)

The CCRA DCO was constructed from the results of the most recent (2019) Job Analysis Study. The results of the study provided the framework for the knowledge and tasks important to the role of a CCRA and therefore the content of the CCRA Exam. To be certified, a CRA is expected to have proficiency in the six (6) main content areas of clinical research, displayed in the chart below. The percent of questions dedicated to each content area are provided.

	Content Areas	Percentage of Items on Exam
١.	Scientific Concepts and Research Design	8%
١١.	Ethical and Participant Safety Considerations	20%
III.	Product Development and Regulation	10%
IV.	Clinical Trial Operations (GCPs)	25%
V.	Study and Site Management	25%
VI.	Data Management and Informatics	12%
	Total	100%

Certified Clinical Research Associates (CCRAs) are expected to have general knowledge of:

- laboratory terminology, tests, and procedures
- basic math, including adding, subtracting, multiplying, dividing, and calculating percentages

The specific knowledge and tasks identified as important are provided in the CCRA DCO, below. Therefore, to prepare to take the CCRA Exam, one should study this outline and especially consider the underlying knowledge, skills, and abilities needed to perform as a CCRA. It is recommended that an eligible CCRA Exam candidate use this outline to identify knowledge gaps for constructing a relevant preparation plan.

## Certified Clinical Research Associate (CCRA<sup>®</sup>) Examination Detailed Content Outline

(Effective October 2019)

As defined by the most recent ACRP Job Analysis Survey, a CCRA<sup>®</sup> shall have proficient **knowledge** (middle column) in the following six (6) content areas of clinical research. A CCRA typically uses this knowledge to perform the **tasks** listed (last column).

Domain I – Scientific Concepts and Research Design – 8% of exam		
Knowledge Statements	Tasks	
Elements of a protocol		
Elements of an investigational brochure (IB) and/or investigational device use (instructions for use)	<ul> <li>Review background information and rationa</li> </ul>	
Elements of and rational for subject eligibility requirements	(e.g. product development plan, IB, therapeutic area, history)	
Rationale for complying with a protocol	<ul> <li>Identify and/or explain standard of care</li> </ul>	
Study design characteristics (e.g. double-blind, crossover, randomized)	<ul> <li>versus research</li> <li>Identify and/or explain study design (e.g. key protocol elements and rationale, blinding, randomization)</li> <li>Identify and/or explain study objective(s) and endpoints</li> </ul>	
Study objective(s) and end points/outcomes Use of supplemental/rescue/comparator product in study design		
Treatment assignments (e.g. randomization, open label, registries)		
Therapeutic area and/or available learning resources (e.g. standard of care versus research		
Domain II – Ethical and Participant Safety Considerations – 20% of exam		

Domain II – Ethical and Participant Safety Considerations – 20% of exam		
Knowledge Statements	Tasks	
Adverse events classification, documentation,	<ul> <li>Ensure site's compliance with IRB/IEC</li> </ul>	
and reporting	requirements and other ethical	
Blinding/unblinding procedures	considerations (e.g. Declaration of Helsinki,	
Components of subject eligibility requirements	Belmont Report)	
Confidentiality and privacy requirements	<ul> <li>Identify the safety and expected therapeutic</li> </ul>	
Components of the safety profile	effects of the investigational product/device	
Elements of the informed consent form	<ul> <li>Develop and/or follow a recruitment strategy</li> </ul>	
Informed consent process requirements	that complies with ethical considerations	
Protection of human subjects (e.g. IRB/IEC	<ul> <li>Recognize subject confidential information</li> </ul>	
requirements, Declaration of Helsinki, subject	<ul> <li>Comply with subject privacy regulations (e.g.</li> </ul>	

compensation)	HIPPA, GDPR)
Protocol deviation/violation identification,	<ul> <li>Develop and/or review informed consent</li> </ul>
documentation, and reporting processes	<ul> <li>Ensure and verify adequate implementation</li> </ul>
Recruitment plan/strategies	and documentation of the informed consent
Safety monitoring	process
Subject discontinuation criteria/procedures	Ensure subject eligibility meets protocol
Subject retention strategies	inclusion/exclusion criteria at enrollment and
Vulnerable subject populations	during study conduct
Conflicts of interest in clinical research	<ul> <li>Develop and/or implement study education</li> </ul>
Elements of fraud and misconduct	plan and/or tools for sites
	<ul> <li>Ensure Investigator assessment and</li> </ul>
	management of subject laboratory values,
	test results, and alerts
	<ul> <li>Identify and/or verify appropriate reporting</li> </ul>
	and documentation of adverse events(s) to resolution
	<ul> <li>Ensure timely review of safety data by site and sponsor</li> </ul>
	• Verify the site's management of safety risks
	(e.g. clinical holds, product recalls,
	DSMB/IDMC)
	Ensure adequate documentation of subject
	discontinuation (i.e. causes, contact efforts)
	<ul> <li>Identify and report potential fraud and misconduct</li> </ul>

Domain III – Product Development and Regulation – 10% of exam		
Knowledge Statements	Tasks	
Product development (e.g. timelines, preclinical, phases, regulatory strategy, life cycle)	<ul> <li>Identify the role and proper composition of IRB/IECs</li> </ul>	
IRB/IEC reporting requirements and communication	<ul> <li>Prepare and/or submit documents for IRB/IEC review/approval</li> </ul>	
IRB/IEC purpose, role, and composition	• Ensure IRB/IEC review/written approval of	
Protocol and protocol amendment submission	study and study documents	
and approval processes	<ul> <li>Inform the sponsor and ensure IRB/IEC</li> </ul>	
Regulatory authority reporting requirements and	submission of any deviations from the	
communication	protocol and document as appropriate	
Safety reporting requirements	<ul> <li>Ensure compliance with study requirements</li> </ul>	
Significance of milestones in the evaluation of	and regulations	
efficacy and safety (e.g. interim analysis results,	<ul> <li>Prepare for and/or participate in audits and</li> </ul>	
DSMB, review)	inspections	

Domain IV – Clinical Trial Operations (GCP) – 25% of exam		
Knowledge StatementsDelegation of responsibilitiesElements of an effective root cause analysis and corrective and preventive action (CAPA) planElements of and rationale for monitoring plan(s)Elements of the investigator's brochure (IB)Monitoring responsibilities (e.g. purpose, extent, procedures)Principals of risk-based monitoringProject feasibility considerationsResponsibilities of various clinical trial entities/personnel (e.g. CROs, sponsors, regulatory authority, data manager)	Tasks• Coordinate protocol and/or protocol amendments through appropriate approval processes (e.g. IRB/IEC, sponsor, regulatory authority)• Facilitate compliance between the sites' standard operating procedures (SOPs) and the study requirements• Verify tat investigational staff is qualified (e.g. CV, medical license, GCP qualifications)• Ensure adequate Principal Investigator oversight• Develop protocol and/or amendments	
Audits and inspection processes (preparation, participation, documentation, and follow up) Pre-study activities Site selection activities Site initiation activities Interim visit activities Site close-out activities Study completion activities Staff qualifications activities Staff/study team training requirements Essential documents (e.g. Trial Master File, Investigative Site File)	<ul> <li>training</li> <li>Identify and communicate issues potentially requiring protocol amendments</li> <li>Develop/update project/trial management tools</li> <li>Develop monitoring guidelines/plans</li> <li>Schedule, coordinate, and/or pre-study site visit(s)</li> <li>Prepare, conduct and/or participate in site initiation, on-site monitoring, remote monitoring, risk-based, close out and comonitoring/training visit(s)</li> </ul>	
	<ul> <li>Ensure source documentation adheres to ALCOA-CCEA principles</li> <li>Ensure investigator/site protocol compliance</li> <li>Document, communicate, and follow up on site visit activities and/or findings</li> <li>Escalate significant findings as appropriate</li> <li>Create, document, and/or implement root cause analysis and /or CAPA plans to completion</li> <li>Maintain Trial Master File</li> <li>Review and reconcile Investigator Site File (e.g. essential documents, logs) and Trial</li> </ul>	

	Master File		
Domain V – Study and Site Management – 25% of exam			
Domain V – Study and SiteKnowledge StatementsCommunication documentation requirements(e.g. phone, email)Equipment and supplies use and maintenanceInvestigational product/device management (e.g.accountability, dispensing, shipment, storage,and documentation requirements)Investigational product/device characteristics(e.g. mechanism of action, stability, etc)Investigational product/device labeling andpackaging requirementsInvestigational product/device reference materialsStudy timelinesPurpose, processes, and management of protocolcompliance/non-complianceRoles of various clinical trial entities/plan (e.g.medical monitor, vendors, IRR/IEC, sponsor, CRO)Sample/diagnostic collection, shipmentverification, reporting and storage requirementsSubject compliance assessmentSubject responsibilities for study participationContracts and budgets (e.g. subjectcompensation, site payment)Study vendors	<ul> <li>Management – 25% of exam</li> <li>Tasks</li> <li>Act as the main source of communication between site and sponsor</li> <li>Evaluate trial sties for participation</li> <li>Follow study plans (e.g. monitoring plan, communication plan)</li> <li>Obtain/verify vendor credentials (e.g. lab certification/licensure)</li> <li>Coordinate access to study systems (e.g. vendor portals, IVRS)</li> <li>Facilitate/verify translation of study documents</li> <li>Verify investigator/site feasibility (e.g. personnel and facilities)</li> <li>Prepare, conduct, and/or participate in study initiation activities (e.g. kick-off meeting, investigator meeting, essential document collection)</li> <li>Plan, conduct, verify, and/or participate in training of the investigational staff</li> <li>Assess subject compliance</li> <li>Re-evaluate the recruitment strategy as needed</li> <li>Manage study supplies (e.g. lab kits, case report forms, study related devices)</li> <li>Verify equipment calibration and maintenance</li> <li>Ensure proper collection, processing, and shipment of specimens (e.g. centrifuge, preparation of slides, freezing, refrigeration)</li> <li>Monitor appropriate staff, facility, and equipment availability throughout the study</li> <li>Identify issues and recommend investigatory/site corrective actions</li> <li>Ensure adequacy of investigational product/device and associated supplies</li> </ul>		

	<ul> <li>product/device and associated supplies</li> <li>Reconcile investigational product/device and associated supplies</li> <li>Manage investigational product/device recall/quarantine</li> <li>Monitor investigational product/device expiration, manage resupply and/or relabeling</li> </ul>
	nt and Informatics – 12% of exam
Knowledge Statements	Tasks
Data management activities Data privacy principles and access to site/subject records Elements and purposes of data collection tools (e.g. CRF/eCRF, patient reported outcome devices) Elements of and process for data query (e.g. query writing) Elements of pharmacovigilance (e.g. CIOMS, IDMC/DSMB, safety databases) Record retention and destruction practices and requirements Source data review (SDR) and source data verification (SDV) purpose and process Source documentation requirements (e.g. ALCOA-CCEA)	<ul> <li>Develop and/or review CRF/eCRF completion guidelines</li> <li>Develop and/or evaluate data collection tools (e.g. case report form (e/CRF), diaries and other collection devices) for consistency with protocol</li> <li>Perform CRF/eCRF user acceptance testing</li> <li>Transmit data to Data Management</li> <li>Identify location of source documentation</li> <li>Conduct source data review (SDR) and/or source data verification (SDV)</li> <li>Ensure timely data entry and review</li> <li>Review, clarify and obtain data changes from sites</li> <li>Issue and resolve data queries</li> <li>Facilitate Investigator CRF/eCRF signatures and database lock</li> <li>Review data for trends (e.g. central monitoring, data listing review)</li> <li>Ensure compliance with electronic data requirements (e.g. passwords and access)</li> <li>Ensure access to source data by authorized parties, and protect confidentiality by limiting unauthorized access</li> <li>Reconcile safety and clinical databases</li> <li>Manage study records retention and availability</li> </ul>
