Writing Learning Objectives

Developing Learning Objectives

Definition:

Learning Objectives are three to five ideas that you would like the participant to learn from your content. Each learning objective should be in compliance with Blooms Taxonomy and provide for a measurable outcome. For more information about Blooms Taxonomy, visit <http://www.nwlink.com/~donclark/hrd/bloom.html>

Writing Learning Objectives:

Learning objectives should complete the sentence:

Upon completion of this session, participants should be able to....

- 1.
- 2.
- 3.

A list of verbs to formulate “measurable” learning objectives is below.

Example of Learning Objectives that are in compliance with Blooms Taxonomy:

Upon completion of this webinar you will be able to:

1. Review characteristics of the most prevalent solid tumors and hematologic malignancies
2. Describe different oncology treatment options, most common toxicities and assessing them in clinical trials
3. Demonstrate knowledge of the most common oncology disease response assessment criteria and their use in clinical trials
